

Parents/Guardians:

Congratulations on your child getting accepted to Bloomsburg University! We want your child to be comfortable living in the residence halls for the fall and spring semester. To make this transition into the dorms comfortable, please send in your child's deposit as soon as possible to try and guarantee your child not to be tripled.

Tripling tends to happen in the dorms more often than not because of the large incoming freshman class. Students who are tripled tend to have more problems with stress in their work and in their room and it also causes unhappiness. However there are positives to tripling, most students who do become tripled like knowing two other people coming into a university also many students do choose to stay tripled.

Students will have the option to detriple if they are even triple. Therefore, we urge students to send in their deposits as soon as possible to not get tripled. If students are tripled then the university will go through a list. Whoever sent in their deposit the earliest will become notified to detriple.

Bloomsburg University works hard to detriple students as soon as possible. We are aware how hard it is for students to decide and even possibly stay tripled. If your child is in a tripled room and stays tripled for either a certain amount of time or for the full academic year, your child will receive compensation. Bloomsburg wants every student to be comfortable in his or her residence halls and Bloomsburg will work fast to make it possible.

Sincerely,

Faculty of Residence Life
